DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR
TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER
FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

1   I, Yan Pritzker, declare and state as follows:

2   1.   I am a co-founder and current Chief Technology Officer of Electric Solidus,

3   Inc. ("Swan").

4   2.   I am also the author of *Inventing Bitcoin: The Technology Behind the First*

5   *Truly Scarce and Decentralized Money Explained* and a leading expert on Bitcoin.

6   **CRYPTOCURRENCY, BITCOIN, AND BITCOIN MINING**

7   3.   Bitcoin mining is the computerized process by which individuals and

8   entities verify and secure Bitcoin transactions and obtain newly minted Bitcoin. Unlike

9   traditional currencies, Bitcoin can be transferred between people or computers without

10   relying on trusted third parties like governments or banks. In a traditional banking

11   system, for example, third-party banks act as ledgers, recording customers' debits and

12   credits, and verifying that money can move from one account to another. In that system,

13   customers must rely on the bank to approve and verify every payment. But Bitcoin is

14   based on a decentralized ledger, wherein every transaction in the Bitcoin network is

15   recorded and verified, not by a single entity like a bank, but by hundreds of thousands

16   of members on a network. Anyone in the world can join the Bitcoin network by

17   connecting their computer to the network and tracking transactions in the ledger.

18   4.   For this network to function, members must verify the transactions. Bitcoin

19   incentivizes network members to verify transactions by holding a "contest" to determine

20   (a) who wins the right to enter these transactions into the ledger and (b) who has the

21   chance to obtain new Bitcoin. Each "miner" seeking to participate attempts to solve a

22   puzzle on the network. Every ten minutes, one miner is chosen at random, and that

23   miner wins the opportunity to record all Bitcoin transactions into the decentralized

24   ledger that took place since the last contest. That miner also gets to present its solution

25   to the puzzle, and, if it provides the correct answer, the miner announces that answer to

26   the rest of the network, along with the input the miner used and the transactions it has

27

28

3

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR
TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER
FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

Gibson, Dunn &
Crutcher LLP

recorded. If the miner completes this full process correctly, it is paid a fee, and the transactions it has announced are called a "block." Every other computer on the Bitcoin network validates the block by confirming that the solution to the puzzle is correct, that the block does not contain any invalid transactions, and that the history within it does not conflict with prior blocks. Those computers then all write the block into their copy of the ledger, appending it into the existing chain of blocks, producing a "blockchain." The successful miner gets the newly minted Bitcoins on the block, and the process repeats ten minutes later.

5.   Bitcoin mining can be extremely lucrative; the value of a single Bitcoin on the date of this filing (September 25, 2024) is approximately $63,000. But mining is also extremely expensive and requires deep expertise, as well as data-driven testing through trial and error to participate profitably at scale. Mining requires highly advanced computers that are specially designed to continuously run the computations needed to enter the "contest" multiple times. In addition to the cost of these machines, Bitcoin mining consumes significant amounts of energy, and mining operations must be constantly monitored to ensure efficient energy use, prevent overheating of the equipment, and optimize the computers and other equipment deployed. The more computers an operation has (and therefore, the more energy it uses), the higher its chances to secure Bitcoin through mining. Lower electricity cost means more mining, higher output, and greater profitability. If this energy and the mining operations are not managed efficiently, the hardware, electricity, and other costs associated with Bitcoin mining can easily exceed the value of the mined Bitcoin.

SWAN AND ITS PROPRIETARY INFORMATION

6.   At Swan, we built out the proprietary aspects of our Bitcoin mining business that would distinguish us from any emerging competitors. We spent significant time and money developing Swan's Bitcoin Network Operating Center ("BNOC"), a

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR
TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER
FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

complex proprietary platform for managing mining data and analytics. BNOC allows Swan to track mining sites, weather, price of Bitcoin, hashrate (the rate of attempts per second to solve the puzzle for the chance to obtain new Bitcoin), and other data concerning mining operations., including the specific combination of factors that lead to the profitability of a specific mining location It can provide a real-time, precise look into mining operations and quickly/immediately pinpoint problems.

7.   Swan developed and owns BNOC, quickly making it an industry leader in Bitcoin mining in two ways. First, because the profitability of Bitcoin mining relies on solving puzzles as quickly as possible while minimizing energy usage and costs, tracking and maximizing operation metrics is crucial to success. Second, BNOC operates as a highly valuable service that provides incredibly detailed, real-time visibility into mining operations.

8.   Additionally, Swan developed, through testing, proprietary hash-rate optimization techniques for Bitcoin mining. Those techniques likewise maximize the number of computations-per-second that mining hardware can perform, increasing the speed at which the computers solve puzzles (which, again, increases their chances to earn Bitcoin) while minimizing costs.

SWAN PROTECTS ITS PROPRIETARY INFORMATION

9.   To protect the competitive advantage Swan's confidential and proprietary mining information conferred on its business, Swan maintains policies and technological safeguards to maintain the secrecy of its confidential information and trade secrets. Swan's Information Security Policy, for example, "ensures that Swan's information assets are properly identified, recorded, and afforded suitable security measures at all times." A copy of the Information Security Policy is attached as **Exhibit A**. The Policy provides that access to Swan documents must be limited to the "most restrictive level possible that still enables the user to perform their job effectively," explains that

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

"[e]mployees and contractors are required to maintain the confidentiality of information to them by Swan, its customers, and suppliers," and identifies seventeen activities that are "strictly prohibited, with no exceptions," including:

- Violations of the rights of any person or company protected by copyright, trade secret, patent, or other intellectual property, or similar laws or regulations. . . .
- Accessing data, a server, or an account for any purpose other than conducting Swan Bitcoin business, even if you have authorized access; and
- Providing information about or lists of Swan Bitcoin employees, contractors, partners, or customers to parties outside Swan Bitcoin without authorization. ***Id.***

10.   Swan securely stores BNOC software code on a developer platform called GitHub and restricts access to specific Swan personnel approved by Swan's Information Security team. In accordance with Swan's policies, the InfoSec team tightly restricts permissions to access BNOC code, limited to only those personnel who are directly involved in managing BNOC (like software developers, security engineers, and platform engineers). Personnel with permission to access GitHub must first access Swan's suite of software tools by entering a unique username to which Swan grants rights to access the code. Users must then correctly enter an SSH Key Pair—a secure access credential used to validate the identity and permissions of the user—before they can access Swan's code.

11.   To access the system that houses Swan's confidential and proprietary information and trade secrets, Swan's mining employees and consultants must enter a password that must meet certain complexity requirements, as well as engage in a multi-factor authentication process that requires the user to successfully present multiple pieces of evidence to prove their identity.

Gibson, Dunn & Crutcher LLP

SWAN'S INVESTIGATION OF DEFENDANTS' CONDUCT

12.   Since August 8, 2024, Swan has been able to retrieve and review electronic data and forensic activity logs associated with departing Bitcoin mining employees' and consultants' accounts and reconstruct their activities.   Swan's investigation into Defendants' departures thus far has uncovered the following:

13.   In late June 2024, Zagury met with Tether's outside counsel for 2040 Energy at the EAST Miami hotel. Shortly thereafter, Zagury drafted a document entitled "Cory Thoughts," which included a recommendation to Swan's CEO to focus solely on Swan's mining business and to split off the other aspects of its Bitcoin business, including Swan's original financial services.   On July 11, 2024, Defendant Naidoo and then-Swan Chief Information Officer and Head of Mining Raphael Zagury planned an "unwind" of Swan's involvement in the 2040 Energy funding arrangement to mine Bitcoin with cryptocurrency company Tether.   They communicated with Zach Lyons, a founder and principal of Marlin Capital Partners, whom I understand manages Tether's interests in 2040 Energy.   The group discussed the possibility of certain Swan employees and consultants leaving Swan for Tether or another operator to "[k]eep doing what [they're] doing."   Lyons told Defendant Naidoo and Zagury that my co-founder and Swan's Chief Executive Officer, Cory Klippsten, "has to realize they [Tether] can take away [Swan's Bitcoin business] tomorrow."   A copy of Zagury's electronic call notes from the meeting, as Swan keeps those records in the ordinary course of business, is attached as **Exhibit B**.

14.   On July 25, 2024, Defendant Monteleone downloaded a component of Swan's BNOC code ("bnoc-cron") within GitHub.   An excerpt of Defendant Monteleone's GitHub log from July 23, 2024 to August 8, 2024, is attached as **Exhibit C**.

Gibson, Dunn & Crutcher LLP

15.   On July 27, 2024, Defendant Holmes, Defendant Naidoo, Zagury, and Lyons met by Zoom. A copy of the Zoom log from this July 27, 2024 meeting, as Swan keeps that record in the ordinary course of business, is attached as **Exhibit D**.

16.   On July 30, 2024, Defendant Monteleone downloaded a copy of Swan's BNOC core mining dashboard code from GitHub and, on some day prior to August 8, 2024, exfiltrated this proprietary code into a code repository outside of Swan's systems, in violation of Swan policy. An excerpt of Defendant Monteleone's GitHub log from July 23, 2024 to August 8, 2024, is attached as **Exhibit C**.

17.   Also on July 30, 2024, Swan's then-Vice President of Institutional Operations & Research Brett Hiley downloaded approximately 319 documents from Swan's Google Drive. Those documents included highly confidential monthly mining performance data, data related to mining inventory, operations, and machine performance and configuration by site, meeting notes, and Swan policies and procedures. Hiley also downloaded a log of weekly reports to Klippsten that provide in-depth analysis and details about all mining sites and operations. An excerpt of Hiley's Google Drive log from September 22, 2024 to August 9, 2024, is attached as **Exhibit E**.

18.   During the first week of August, Zagury exported data off Swan's internal "Notion" platform. ("Notion" is an all-in-one shared digital workspace). This included confidential business information concerning ongoing deals with a Swan business partner. An excerpt of the Notion log from July 6, 2024 to August 1, 2024, showing Zagury's file exportation is attached as **Exhibit F**.

19.   That same week, Defendant Naidoo too, downloaded numerous documents from Swan's Google Drive including, for example, highly confidential monthly mining performance data, proprietary financial records, contracts, and earnings reports. One of the documents that Defendant Naidoo downloaded is a "2040_site_database" spreadsheet that houses all Swan's proprietary information related to its hash-rate

Gibson, Dunn & Crutcher LLP

1   optimization techniques. An excerpt of the Google Drive log from July 20, 2024 to

2   August 8, 2024, showing Naidoo's file exportation is attached as **Exhibit G**.

3   20.   Also, that same week, Defendant Furlong downloaded modeling files

4   containing proprietary formulas and logic that support Swan's BNOC, which on

5   information and belief, he would not have downloaded in connection with his day-to-

6   day role at Swan. An excerpt of Furlong's Slack log from August 1, 2024 to August 9,

7   2024 showing Furlong's file exportation is attached as **Exhibit H**.

8   21.   On August 4, 2024, Zagury downloaded all of Swan's BNOC code from

9   GitHub. An excerpt of the GitHub log from September 13, 2024 to August 4, 2024,

10   showing Zagury's downloading of BNOC code is attached as **Exhibit I**.

11   22.   On August 6, 2024, Defendant Holmes, Defendant Naidoo, Zagury, Swan's

12   then-General Counsel Bill Belitsky, and Swan's then-outside counsel met and Zagury

13   took contemporaneous notes in his Swan corporate Google Workspace account, which

14   Swan's security team uncovered in the course of its investigation. The notes mentioned

15   a "rain and hell fire" plan to steal Swan's IP with "legal cover from Tether," to form

16   Proton Management, for Tether to reassign the management of 2040 assets to Proton,

17   and that "Team resignation and move with Tether needs to be on tandem." An excerpt

18   of Zagury's August 6, 2024 notes is attached as **Exhibit J**.

19   23.   Between August 6, 2024 to August 8, 2024, Zagury downloaded

20   approximately 1,749 files from Swan's computer systems to an external hard drive

21   named "G-Tech External HDD." These files included, for example, Swan's proprietary

22   financial records, strategic development records, contracts, term sheets, Bitcoin mining

23   operating models, Bitcoin wallet information regarding Swan and its partners within

24   2040 Energy, Slack communications, email correspondence and attachments, and

25   Bitcoin code. One of the documents Zagury downloaded is a "2040_site_database"

26   spreadsheet that houses all of Swan's proprietary information related to its hash-rate

27

28

9

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR
TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER
FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

optimization techniques. An excerpt of the log from August 6, 2024 to August 8, 2024, showing Zagury's file extraction is attached as **Exhibit K**.

24.   On August 8, 2024, a Zoom call log shows a meeting between Defendant Holmes, Defendant Monteleone, Defendant Naidoo, Defendant Romualdez, Defendant Vasconcelos, Zagury, other Swan conspirators, and Lyons for several hours. A copy of the August 8, 2024 Zoom log, as Swan keeps that record in the ordinary course of business, is attached as **Exhibit L**.

25.   Sometime that day, then-Swan Staff Accountant Aleksander Dozic downloaded approximately 616 files from his company-issued laptop to an external hard drive named "\Device\HarddiskVolume 7\". These files included economic modeling related to Swan's mining and general business operations, Swan budgets, general ledgers, invoices related to Bitcoin mining, mining inventories, contracts, Bitcoin wallet information regarding Swan and its partners within 2040 Energy, energy reports, banking information, and earnings reports broken down by individual mining sites. An excerpt of Dozic's laptop download log from August 8, 2024 to August 9, 2024, showing Dozic's file extraction is attached as **Exhibit M**.

26.   Dozic also downloaded a document off Swan's Notion's platform titled "Invoice and Payments Tracker," which includes Swan's confidential and proprietary pricing information related to Bitcoin mining. An excerpt of the Notion log from August 8, 2024 to August 9, 2024, showing Dozic's file exportation is attached as **Exhibit N**.

27.   Also on August 8, 2024, Defendant Monteleone received an alert from GitHub to his Swan work email address, informing him of an error in building a version of BNOC software that appeared identical to Swan's, indicating that BNOC code had been cloned and stolen to an unauthorized location. Like Zagury, it appears that Defendant Monteleone was attempting to duplicate Swan's code and exfiltrate it to the GitHub organization "elektron-tech" and repository named "nxt" not associated with

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

Gibson, Dunn &
Crutcher LLP

Swan.   Four minutes after the first alert, GitHub sent another alert to Defendant Monteleone's Swan work email address confirming he had removed his Swan work email address from his GitHub account. A copy of the GitHub alerts to Monteleone's Swan work email address, as Swan keeps those records in the ordinary course of business, is attached as **Exhibit O**.

28.   On August 8, 2024, Defendants Holmes (for his personal company Defendant Ilios), Naidoo, Monteleone, Romualdez, Furlong, and Vasconcelos, along with Zagury and others, submitted notices of resignation from Swan to Klippsten. Belitsky also submitted his notice of resignation in the morning on August 9, 2024.

29.   From August 13, 2024 to August 27, 2024 Swan has sent multiple, written requests to Defendants Holmes, Naidoo, Monteleone, Romualdez, Furlong, and Vasconcelos to return their company-issued devices to Swan, as required by their consulting contracts with Swan. Copies of those emails, as Swan keeps those records in the ordinary course of business, are attached as **Exhibits P-U**. None did so.

30.   While Swan has shut off Defendant Monteleone's, Defendant Vasconcelos', and other former Swan personnel's access to Swan's personal GitHub, Swan can see their general activity on GitHub during the weeks of August and September 2024. It shows that they have had high activity levels during that time period. A copy of Defendant Monteleone's, Defendant Vasconcelos', and Zagury's GitHub activity logs as of September 18, 2024, is attached as **Exhibit V**.

31.   Based on the documents and information from Swan's ongoing investigation, I believe Defendants and others took Swan's proprietary information in coordinated fashion. They downloaded or transferred a large amount of Swan's most sensitive, proprietary, confidential information and computer code in the short time before they resigned together from Swan on August 8, 2024, which is not consistent with what they would have been doing in the ordinary course for Swan.

DECLARATION OF YAN PRITZKER IN SUPPORT OF PLAINTIFF'S *EX PARTE* APPLICATION FOR TEMPORARY RESTRAINING ORDER WITHOUT NOTICE, LIMITED PROTECTIVE ORDER, ORDER FOR ALTERNATIVE SERVICE, AND OSC RE: PRELIMINARY INJUNCTION

Gibson, Dunn & Crutcher LLP

1   32.   The proprietary and confidential information, data, software, and code
2 Defendants took from Swan reflects Swan's significant time, work, and expenditure. It
3 is extremely valuable to Swan and confers a significant competitive advantage in Bitcoin
4 mining. In the hands of a competitor, this information can cause immediate and long-
5 term competitive damage to Swan, as well as diminish Swan's long-term prospects for
6 investors. Defendants can use this information to immediately begin Bitcoin mining
7 exactly like Swan, interfering with and supplanting Swan's current and future plans and
8 collaborations. The harm Swan faces is not only financial; Defendants can also use the
9 information they took to disrupt Swan's relationships and positive reputation in the
10 Bitcoin industry, a reputation Swan has spent years and millions of dollars to establish.

    I declare under penalty of perjury that the foregoing is true and correct.

Executed this 25th day of September 2024, at Gleview, Illinois.

Exhibit A

S Swan

Information Security Policy (Acceptable Use Policy)

Information Security Policy (Acceptable Use Policy)

Purpose

This policy establishes the foundation for implementing and managing an effective Information Security Program at Electric Solidus, Inc. (d/b/a "Swan Bitcoin") and its information assets.

The Information Security Policy provides a foundation for Swan Bitcoin to implement and manage an effective Information Security Program, which ensures that Swan's information assets are properly identified, recorded, and afforded suitable security measures at all times. This document sets forth certain principles regarding the responsible use of information by Swan Bitcoin and outlines the roles and responsibilities of personnel to protect the confidentiality, integrity, and availability of Swan's services and data.

At its sole discretion, the Swan Policy Workgroup, composed of the CTO, COO, and CISO, may modify this Policy at any point in time without notice.

Scope

This policy applies to the use of information, electronic and computing devices, and network resources to conduct Swan Bitcoin business or interact with internal networks and business systems. All employees, contractors, consultants, temporary, and other workers at Swan Bitcoin and its subsidiaries are responsible for exercising good judgment regarding the appropriate use of information, electronic devices, and network resources in accordance with Swan Bitcoin policies and standards, and local laws and regulations.

This policy applies to employees, contractors, consultants, temporaries, and other workers at Swan Bitcoin, including all personnel affiliated with third parties. This policy applies to all Swan Bitcoin-controlled company and customer data as well as all equipment, systems, networks and software owned or leased by Swan Bitcoin.

The scope of this policy is applicable for all employees, and contractors who have been given access to Swan's information and information processing facilities.

Policy Statement

The data that resides at Swan Bitcoin is of great value to Swan Bitcoin. Due to the increasing value of the data we collect, store, process, and share with our partners, it is an absolute priority to protect such data. The management of Swan Bitcoin is committed to developing, adopting, and maintaining appropriate

Exhibit A
Page 14

S *Swan*

Information Security Policy (Acceptable Use Policy)

information security policies, standards and procedures to ensure the integration of information security with Swan's mission, business strategy, and risk posture in accordance with applicable regulatory guidelines.

This will be accomplished by Swan Bitcoin Board and Management oversight, effective management and monitoring of information security risks, delineation of clear accountability for information security and establishing appropriate organizational processes to ensure that information security risks are appropriately and regularly identified, monitored and controlled.

This policy applies to all Swan Bitcoin employees and contractors/vendors. Additionally, this policy is supported by daily operational security procedures that have been developed in conjunction with this policy.

This policy is necessary in order to maintain Swan Bitcoin compliance with applicable laws and standards, protect Swan Bitcoin from liability and protect the confidentiality, integrity, and availability of our systems, data, and network resources.

General Controls

Access must be granted based on the rule of least privilege. Systems administrators configure access to the most restrictive level possible that still enables the user to perform their job effectively. Escalated privileges require authorization from management.

Each user is personally responsible for all system activity associated with their assigned User IDs, except where it can be shown that the User ID and password were co-opted without the assigned user's knowledge and through no negligence on their part. Assigned User IDs and passwords may not be shared with anyone else.

Information systems that store, process, or transmit customer data, personally identifiable information, and any other data covered by Swan's Privacy Policies are subject to additional technical and organizational controls to ensure compliance with relevant laws and regulations. Employees and contractors are required to maintain the confidentiality of information entrusted to them by Swan, its customers, and suppliers.

Unauthorized use or distribution of proprietary information violates Swan's Policy and may be illegal and result in civil and/or criminal penalties. Any employee who abuses the privilege of Swan granted access to electronic media and services may be subject to disciplinary action, up to and including termination of their employment.

Within the company, no guarantee of privacy is afforded for any data or information created, processed, stored, or transmitted using company-owned equipment or networks. Access and activity logging, monitoring, and auditing of company computers, network traffic, emails, and/or data files may be required on occasion to verify compliance with company policies, laws, regulations, or contractual obligations. Such monitoring and auditing will occur at the discretion of the company and/or management in accordance with electronic communications system monitoring practices.

Swan

Information Security Policy (Acceptable Use Policy)

Termination may be warranted, even on the first offense, depending on the seriousness of the misconduct. Discipline is the responsibility of Human Resources.

This Information Security Policy serves as the primary governing security policy that directs the enforcement of all sub-policies, standards, and processes. Sub-policies include but are not limited to:

- Acceptable Use Policy
- Access Control Policy
- Business Continuity and Disaster Recovery Policy
- Change Management Policy
- Data Retention and Disposal Policy
- Incident Management Policy
- Information Classification Policy
- Key Management and Cryptography Policy
- Logging and Monitoring Policy
- Network Security Policy
- Vendor Management Policy
- Vulnerability Management Policy

Information Security Policy statements are as follows:

- Implement and maintain the Information Security Program at Swan Bitcoin.
- To continuously improve and align Information Security Practices to global best practices and standards. Information Security policies shall be reviewed regularly. It shall be ensured that the employees understand the policies and abide by them.
- Security Awareness training shall be imparted regularly.
- Internal Assessments or Audits of Swan Bitcoin's Information Security Program shall be performed periodically, and any gaps or findings shall be remediated in a timely manner.
- A Risk Assessment process for Swan Bitcoin's information assets shall be defined and followed. Risk reduction shall be carried out through the process of continuous improvement.
- Swan Bitcoin's information asset inventories shall be reviewed and updated when a new asset is added. Business continuity plans shall be reviewed and tested. Roles and responsibilities shall be clearly defined, and all involved need to be aware.
- Information should be classified and handled according to its criticality and sensitivity as well as with relevant legislative, regulatory, and contractual requirements.
- Appropriate contacts with relevant authorities and special interest groups or other specialist security forums shall be maintained.
- Requirements for confidentiality or non-disclosure agreements reflecting the organization's needs for the protection of information shall be identified, regularly reviewed, and documented.
- Swan Bitcoin shall implement detection, prevention, and recovery controls to protect against malware, combined with appropriate user awareness.

S Swan

Information Security Policy (Acceptable Use Policy)

Security Incident Reporting

All users are required to report known or suspected security events or incidents, including policy violations and observed security weaknesses. Incidents shall be reported immediately or as soon as possible by sending an email to: **swandesk@swanbitcoin.com** or reporting in the **#general-security** Slack channel.

In your report, please describe the incident or observation along with any relevant details.

Whistleblower Anonymous Fraud Reporting

Our Whistleblower Policy is intended to encourage and enable employees and others to raise serious concerns internally so that we can address and correct inappropriate conduct and actions. All employees are responsible for reporting concerns about violations of our code of ethics or suspected violations of law or regulations that govern our operations.

It is contrary to our values for anyone to retaliate against any employee who, in good faith, reports an ethics violation or a suspected violation of law, such as a complaint of discrimination, suspected fraud, or suspected violation of any regulation. An employee who retaliates against someone who has reported a violation in good faith is subject to discipline up to and including termination of employment.

Anonymous reports may be submitted using the **Swan Bitcoin Anonymous Whistleblower Form.**

Mobile Device Policy

All end-user devices (e.g., mobile phones, tablets, laptops, desktops) must comply with this policy. Employees must use extreme caution when opening email attachments received from unknown senders, which may contain malware.

System-level and user-level passwords must comply with the Access Control Policy. Providing access to another individual, either deliberately or through failure to secure a device, is prohibited.

All end-user, personal (BYOD), or company-owned devices used to access Swan Bitcoin information systems (i.e. email) must adhere to the following rules and requirements:

- Devices must be locked with a password (or equivalent control such as biometric) protected screensaver or screen lock after 15 minutes of non-use.
- Devices must be locked whenever left unattended
- Users must report any suspected misuse or theft of a mobile device immediately to their manager or the security team.
- Confidential information must not be stored on mobile devices or USB drives (this does not apply to business contact information, e.g., names, phone numbers, and email addresses)
- Any mobile device used to access company resources (such as file shares and email) must not be shared with any other person
- Upon termination, users agree to return all company-owned devices and delete all company information and accounts from any personal devices.

Swan

Information Security Policy (Acceptable Use Policy)

Remote Access Policy

Laptops and other computer resources that are used to access the Swan Bitcoin network must conform to the security requirements outlined in Swan Bitcoin Information Security Policies and adhere to the following standards:

- To ensure mobile devices do not connect a compromised device to the company network, Antivirus policies require the use and enforcement of client-side antivirus software
- Antivirus software must be configured to detect and prevent or quarantine malicious software, perform periodic system scans, and have automatic updates enabled
- Users must not connect to any outside network without a secure, up-to-date software firewall configured on the mobile computer
- Users are prohibited from changing or disabling any organizational security controls such as personal firewalls, antivirus software on systems used to access Swan Bitcoin resources
- Use of remote access software and/or services (e.g., VPN client) is allowable as long as it is provided by the company and configured for multifactor authentication (MFA)
- Unauthorized remote access technologies may not be used or installed on any Swan Bitcoin system
- Users shall use a VPN when transmitting confidential information on public Wi-Fi
- If you access from a public computer (e.g., from a business center, hotel, etc.), log out of the session and don't save anything. Don't check "remember me", collect all printed materials, and do not download files to a non-Swan Bitcoin-controlled system

Acceptable Use Policy

Swan Bitcoin proprietary and customer information stored on electronic and computing devices, whether owned or leased by Swan Bitcoin, the employee, or a third party, remains the sole property of Swan Bitcoin for the purposes of this policy.

Employees and contractors must ensure that proprietary information is protected in accordance with the Data Management Policy through legal or technical means. Users of laptops or company-issued devices must use Notion and/or Google Drive for business file storage. Storing important documents on the file share is how you "backup" your laptop.

Employees and contractors are responsible for promptly reporting the theft, loss, or unauthorized disclosure of Swan Bitcoin's proprietary information or equipment. You may access, use or share Swan Bitcoin proprietary information only to the extent it is authorized and necessary to fulfill your assigned job duties. Employees are responsible for exercising good judgment regarding the reasonableness of personal use of company-provided devices.

For security and network maintenance purposes, authorized individuals within Swan Bitcoin may monitor equipment, systems, and network traffic at any time.

Users shall not leave confidential materials unsecured on their desks or workspace and will ensure that screens are locked when not in use.

S Swan

Information Security Policy (Acceptable Use Policy)

Swan Bitcoin reserves the right to audit networks and systems on a periodic basis to ensure compliance with this policy.

Unacceptable Use

The following activities are, in general, prohibited. Employees may be exempted from these restrictions during the course of their legitimate job responsibilities with properly documented Management approval. Under no circumstances is an employee of Swan Bitcoin authorized to engage in any activity that is illegal under local, state, federal, or international law while utilizing Swan Bitcoin-owned resources or while representing Swan Bitcoin in any capacity. The list below is not exhaustive but attempts to provide a framework for activities that fall into the category of unacceptable use.

The following activities are strictly prohibited, with no exceptions:

1. Violations of the rights of any person or company protected by copyright, trade secret, patent, or other intellectual property, or similar laws or regulations, including, but not limited to, the installation or distribution of "pirated" or other software products that are not appropriately licensed for use by Swan Bitcoin.
2. Unauthorized copying of copyrighted material including, but not limited to, digitization and distribution of photographs from magazines, books, or other copyrighted sources, copyrighted music, and the installation of any copyrighted software for which Swan Bitcoin or the end user does not have an active license
3. Accessing data, a server, or an account for any purpose other than conducting Swan Bitcoin business, even if you have authorized access, is prohibited
4. Exporting software, technical information, encryption software, or technology in violation of international or regional export control laws is illegal. The appropriate management shall be consulted prior to the export of any material that is in question
5. Introducing malicious programs into the network or systems (e.g., viruses, worms, Trojan horses, email bombs, etc.)
6. Revealing your account password to others or allowing use of your account by others. This includes family and other household members when work is being done at home
7. Using a Swan Bitcoin computing asset to actively engage in procuring or transmitting material that is in violation of sexual harassment or hostile workplace laws
8. Making fraudulent offers of products, items, or services originating from any Swan Bitcoin account
9. Making statements about warranty, expressly or implied, unless it is a part of normal job duties
10. Affecting security breaches or disruptions of network communication. Security breaches include, but are not limited to, accessing data of which the employee is not an intended recipient or logging into a server or account that the employee is not expressly authorized to access unless these duties are within the scope of regular duties. For purposes of this section, "disruption" includes, but is not limited to, network sniffing, pinged floods, packet spoofing, denial of service, and forged routing information for malicious purposes
11. Port scanning or security scanning is expressly prohibited unless prior notification to the Swan Bitcoin engineering team is made
12. Executing any form of network monitoring that will intercept data not intended for the employee's host unless this activity is a part of the employee's normal job/duty
13. Circumventing user authentication or security of any host, network, or account

Exhibit A
Page 19

Swan

Information Security Policy (Acceptable Use Policy)

14. Introducing honeypots, honeynets, or similar technology on the ELECTRIC SOLIDUS, INC. network.
15. Interfering with or denying service to any user other than the employee's host (for example, denial of service attack)
16. Using any program/script/command or sending messages of any kind with the intent to interfere with or disable a user's session via any means
17. Providing information about or lists of Swan Bitcoin employees, contractors, partners, or customers to parties outside Swan Bitcoin without authorization

Email and Communication Activities

When using company resources to access and use the Internet, users must realize they represent the company and act accordingly.

The following activities are strictly prohibited, with no exceptions:

1. Sending unsolicited email messages, including the sending of "junk mail" or other advertising material to individuals who did not specifically request such material (email spam).the
2. Any form of harassment via email, telephone, or text, whether through language, frequency, or size of messages
3. Unauthorized use or forging of email header information.
4. Solicitation of email for any address other than that of the poster's account with the intent to harass or collect replies.
5. Use of unsolicited email originating from within Swan Bitcoin networks or other service providers on behalf of or to advertise any service hosted by Swan Bitcoin or connected via the Swan Bitcoin network.

Role	Purpose
Access Control Policy	To limit access to information and information processing systems, networks, and facilities to authorized parties in accordance with business objectives.
Asset Management Policy	To identify organizational assets and define appropriate protection responsibilities.
Business Continuity & Disaster Recovery Plan	To prepare ELECTRIC SOLIDUS, INC. in the event of extended service outages caused by factors beyond our control (e.g., natural disasters, man-made events), and to restore services to the widest extent possible in a minimum time frame.

Exhibit A
Page 20

ⓢ *Swan*

Cryptography Policy	To ensure proper and effective use of cryptography to protect the confidentiality, authenticity and/or integrity of information.
Data Management Policy	To ensure that information is classified and protected in accordance with its importance to the organization.
Human Resources Policy	To ensure that employees and contractors meet security requirements, understand their responsibilities, and are suitable for their roles.
Incident Response Plan	Policy and procedures for suspected or confirmed information security incidents.
Operations Security Policy	To ensure the correct and secure operation of information processing systems and facilities.
Physical Security Policy	To prevent unauthorized physical access or damage to the organization's information and information processing facilities.
Risk Management Policy	To define the process for assessing and managing ELECTRIC SOLIDUS, INC.'s information security risks in order to achieve the company's business and information security objectives.
Secure Development Policy	To ensure that information security is designed and implemented within the development lifecycle for applications and information systems.
Third-Party Management Policy	To ensure the protection of the organization's data and assets that are shared with, accessible to, or managed by suppliers, including external parties or third-party organizations such as service providers, vendors, and customers, and to maintain an agreed level of information security and service delivery in line with supplier agreements.

Policy Compliance

Swan Bitcoin will measure and verify compliance to this policy through various methods, including but not limited to ongoing monitoring, and both internal and external audits.

Swan

Information Security Policy (Acceptable Use Policy)

Responsibilities

All employees and contractors must be responsible and authorized for adherence to this policy. Systems owners, data owners and Information Security must be responsible and authorized for enforcement of this policy. Each Swan manager is responsible for ensuring all assigned employees and contractors are aware of their obligations under this policy and for setting an example through strict adherence. Employees should be recognized and rewarded for observing good security practices and disciplined appropriately in case of non-compliance. Managers shall advise Information Security of any noncompliance so that necessary remedial actions can be taken. Managers who sponsor or project-manage implementation of purchased, internally developed, or third-party hosted systems are responsible for ensuring that the system conforms to this policy.

Enforcement

Failure to follow this policy may result in disciplinary action up to and including separation from Swan.

Distribution

Swan management must approve, publish, and endorse all policies. This policy must be published and distributed to all appropriate Swan parties (employees, contractors, vendors, service providers, and business partners).

Exceptions to Policy

In instances where there is a justifiable need to perform actions that are in conflict with Swan policy standards, The CISO, in coordination with key members of the Policy Workgroup, will consider providing a waiver for these exceptions. Swan recognizes that policies cannot be created and enforced that address 100% of all company issues. Exceptions are designed to facilitate new Swan needs or to address areas where current policies do not address technological changes. However, it is the responsibility of Management to understand and mitigate risks.

Any exceptions will be reviewed on a periodic basis, dependent on the level of risk involved in the exception and the level of mitigating controls implemented to manage the risk of the exception.

Revision History and Approval

San Call / Zach

He sees no value at Swan at all
Supports the unwind
This is where the value is
They know that - even G
Swan is a venture thing
Capital went no where
Keep doing what we're doing
Get on a call with us ahead of meeting G next week
He knew many of the issues
Cory / Gui involvement | Very distant
Cap table at Swan
Best thing to business
Zach mentioned political capital
Bitdeer done without shit on Series C
Cory has to realize they can take away tomorrow
Next step - call 3 of us
Misrepresenting valuation
Pledging 2040 to Trust

REDACTED VERSION OF DOCUMENT PROPOSED TO BE FILED UNDER SEAL

From:	raphael@swanbitcoin.com
Subject:	Call with Bill, Max, Alex, San
Date:	Tuesday, August 6, 2024 5:08:53 AM

Call with Bill, Max, Alex, San

Better together or Alex leaves first?
. Send list of points
. Post - termination
. Walks away together - no solicitation? Resign en masse. Makes it easier for Alex.
. Alex sends the e-mail. Terminates agreement.

. Alex sends e-mails to invite everyone. New opportunity - join us. Only one inviting others.
. Over non-solicit; non-compete.
. Confidentiality and IP - we would be exposed. Something in writing. If we do this staged walk out. Legal cover from Tether.
. Call a meeting and appoint Proton Management
. Alex send e-mail out. Announcing Proton Management is the management company.
. Then Alex sends out e-mail to team. Join Proton.
. No leverage to include releases.

Tether needs to send default notice.
____

███
███████████████████████████████████

█████████████████.

Last week you'd unleash hell on this guy.

. Alex leaves
. Breach
. Proton is assigned manager of 2040 assets
. All communications go to new management company
. ROFR gone if Alex resigns
. Written communications. Alex terminated his agreement. We don't need a board resolution.

. Bring the heat
. Giancarlo side convs. ?

██
███████████████████.

They cannot go and say we didn't do it by the book.

Rain and hell fire needs to start. Needs to be an exit, not a nice transaction.

█████████████████   is moot when Alex leaves. Already moot now. Double covered the second Alex leaves.

Bill interrogated if anyone asked him to join mining.

_____

██████████████████████

Status of Proton - update - formed, formalizing docs.
Entity Ethiopia - Alex and Dan to hold interest in Ethiopia. No US Directors.

████ is needed - less if Alex leaves. Alex not at company a bit easier. Key concern - getting more and more fragile. ████████████████████
